## About Me

Hi, I'm Manu Barreto. I'm a Sr Frontend developer with more than nine years of experience in the field. I specialize in Javascript technologies such as React, HTML5, CSS3, Node.js, GraphQL, Jest, and Git. Additionally, I have experience with cloud services such as AWS, GCP, Kubernetes, Docker and Algolia. I am an intermediate level technical English speaker, and a motivated problem solver and creative thinker. I'm passionate about pushing myself to learn and use my skills to improve the user experience. I'm always open to listening to the opinions of my teammates and taking any opportunities that present themselves to improve.

## Experience

**June 2021 / February 2023**

**Mercadolibre - Sr Software Engineer**

Technologies: React js, storybook, jest

Tasks: As a senior frontend developer, I served as a bug fixer and technological reference. Along with my team, we carried out a disruptive change in the CX-HELP area of the platform.

**July 2020 / June 2021**

**Navent Finprop (Zonaprop guarantees) - Sr Frontend Developer**

Technologies: React js, storybook, jest, GCP, Nextjs, kubernetes and docker

Tasks: As a senior frontend developer, I served as a bug fixer and technological reference. I was in charge of updating the platform constantly in terms of technologies and libraries, as well as proposing new technologies for the site. I developed the new credit platform for the Zonaprop guarantee site.

**January 2019 / February 2020**

**Bassett - Full Stack SSR Developer**

Technologies: React js, Redux/Context, GraphQL, hooks, Storybook, Express, Emotion for css, yarn, git, Go, aws: ec2, dynamo and s3. For content indexing use Algolia.

Tasks: As a full-stack developer, I monitored the product and provided support and personalized attention to the main clients of the company, offering fast and efficient solutions. I spent part of my time fixing bugs in the main app. Additionally, I was in charge of bringing new technologies to the site. From a frontend perspective, I analyzed if we could apply new frameworks or libraries and analyzed the app's performance with tests (Jest).

**January 2015 / March 2016**

**Almundo - Frontend Developer for the Mobile-Web area**

Technologies: HTML5, Compass css3, git, Nodejs, jQuery, Groovy java

Tasks: developed and maintained the mobile-web area of the Almundo website.

**March 2012 / January 2015**

**Despegar - Frontend Developer for the Mobile-Web area**

Technologies: HTML5, Compass css3, git, Nodejs, jQuery, Groovy java

Tasks: I developed and maintained the mobile-web area of the Despegar website.

## Education

DaVinci School of Multimedia Art: Multimedia Designer

Bachelor of Art, Design and Communication: New School of South
